LocoPalm™ Instructions

A. Load applications to PDA

   1. Copy demo files from floppy to the PC you hot sync with or download demo files to the PC from www.locopalm.com.

   2. Hot sync with your PC to install applications on your PDA.

   3. To convert from demo mode to full mode, follow the registration instructions at www.locopalm.com. There is an additional charge for registration.

B. Connect PDA to LocoNet®

   1. Plug the appropriate LocoPalm™ Cable in to the bottom of your PDA.

   2. Access the LocoPalm™ App you want to run.

   3. Turn on your Digitrax LocoNet® System.

   4. Plug the RJ12 end of the LocoPalm™ Cable into any LocoNet® jack on your Digitrax system.

   5. Use the app you have chosen.

Special Note for LPM100 & LPM100+

Some users find that the cable does not fit tightly enough to remain attached to the PDA unit during operation. If this is the case, you can improve the spring retention force as follows:

1. Strip the plastic jacket off a small piece of 22AWG wire.
2. Discard the wire.
3. Cut 2 short pieces of the plastic jacket -approximately 3/32".
4. Insert the pieces into the engagement tabs on the LPM100/LPM100+ plug as shown here.

Insert small pieces of wire jacket as shown here
