

Complete Train Control
Run Your Trains, Not Your Track!

DHDP

HO Scale

Dummy Plug for use with
DH Series Wiring Harness

Convenient 5 Pack

Features

- Run your DH harness equipped locos on DC when you don't have a decoder connected
- Use with DHWH, DHWHP, and DHWHPS harnesses (sold separately and included with some decoders)
- Allows you to share decoders among several compatible locomotives
- Interoperable with other DCC systems
- Adds directional lighting to compatible DC locomotives

Parts List

5 DHDP Dummy Plug

1 Instruction Manual

Installation Instructions

The Digitrax DHDP is shipped from the factory as a single unit that contains five individual circuit boards.

1. To separate the plugs, carefully snap them apart along the pre-scored lines on the circuit boards.
2. Plug the 9 pin plug from the DH series harness into the 9 pin socket of the dummy plug.
3. Your locomotive is now ready to operate on DC layouts.
4. The Dummy Plug gives normal and reverse locomotive motor and directional lighting.

Note: The DHDP is configured for locomotives with incandescent directional lamps. Some locomotives with LEDs may not be compatible with this design. In this case the motor will function but the rear LED may not light when in reverse on DC power. This is not a failure of the DHDP.

Digitrax manuals and instructions are updated periodically. Please visit www.digitrax.com for the latest version..
