

Digitrax Signal System

Pennsylvania RR Permissive Position Signal Wiring

Common cathode wiring is illustrated here.

For common anode wiring, swap polarity for LEDs and steering diodes.

All LEDs are yellow/amber.

Complete instructions for Digitrax Signal System are included in your SE8 Signal Decoder Instruction Booklet.

NOTE:

If Digitrax Signal Mast Bases or Terminal Strip Mounting Boards are not used, you must provide current setting resistors with a min of 100 ohms to prevent damage.
