
13MM ROUND 8 OHM SPEAKER

Features:

- 13mm round 8 Ohm speaker with wires

Parts List

- 1 13mm round 8 Ohm speaker with wires

Additional Information

Red wire is positive and the black wire is negative

Many Digitrax HO decoders are optimized for 32ohm speakers, consult factory documentation for your decoder model to verify recommended speaker impedance.

Digitrax N scale decoders are optimized for 8ohm speakers and will operate with 32 ohm speakers of any size with slightly reduced output power.

For best sound level, or perceived acoustic volume, it is important to mount the speaker in a baffle system that provides adequate acoustic matching. Simply increasing the CV's for volume e.g. CV58, will simply lead to overdriving and distortion in a poorly matched speaker.
